- Scrum & Agile Methodologies
- Swift UI
- XCode

APPLICABLE SKILLS

- Graphic Design
- Color Theory
- 2D Design

PROJECTS

COVID-19 DASHBOARD

HTML, CSS, TypeScript, React, Material UI, Axios

Created a web app for tracking data on the COVID-19 pandemic. Displays raw data, changes over time, graph trends, and heat maps. Tracks active cases, total cases, recoveries, deaths, and vaccine data.

<https://taintedbones.github.io/covid-dash/>

DND COMBAT TRACKER

HTML, CSS, TypeScript, React, Material UI, Firebase

Designed and developed a Dungeons and Dragons combat initiative tracker. Full Stack Application uses Firebase to manage user data & authentication. Allows users to create combat scenarios for managing data during campaigns.

SPACE GEO

HTML, CSS, JavaScript, React, Material UI

Developed an educational website about how geology is used to study the galaxy. Created using React and Material UI, and hosted on GitHub pages.

<https://taintedbones.github.io/space-geo>

MOVIE NIGHT

HTML, CSS, JavaScript, React, Material UI

Designed and developed front end of MERN stack webapp. Created pages that displayed titles and posters of nominated films from database using MongoDB and IMDB API. Additionally, implemented pop up window that displayed movie and nomination details when poster is selected.

EDUCATION

CALIFORNIA STATE UNIVERSITY, FULLERTON | FULLERTON, CA

- Bachelor of Science in Computer Science (2022)
